

Essential Nmap Commands for Cybersecurity Learners

<https://www.linkedin.com/in/halilbaris/>

Basic Scan

```
nmap <target>
```

Scan Specific Ports

```
nmap -p <port1,port2,...> <target>
```

Aggressive Scan and Stealth

```
nmap -A <target>
```

```
nmap -S <spoofed ip> <other options>
```

```
nmap --source-port <port no> <other options>
```

OS Detection

```
nmap -O <target>
```

Service Version Detection

```
nmap -sV <target>
```

Scan a Range of IPs

```
nmap <start-ip>-<end-ip>
```

Scan Subnet

```
nmap <network>/CIDR
```

Stealth Scan (SYN Scan)

```
nmap -sS <target>
```

UDP - TCP Scan

```
nmap -sU <target>  
nmap -sT <target>
```
